

Dear parents,

I am writing to congratulate some of our students on their fantastic performance in the European Maths Challenge this year!

This is the first time our school has entered into a European schools event, and it has been a success.

Fifty-four students registered and they managed to achieve some **great results!**

These statistics show our students' performance in the Mathletics activities during the challenge:

Average First Attempt Score	83%
Average last Attempt Score	98%
Overall improvement in students results	18%

Four of our students did exceptionally well and we would like to **celebrate** their and all participating students' performance, on the **14th June in a whole school assembly**.

Well done Ahmed Amr El Refaie (year 3),

Erik Larson (year 2),

Yuval Amichay (year 3) and

Mihai-Ioan Poponete (year 2) and

all students who participated.

Mathletics, the program behind the challenge, is an online subscription site for schools and for parents, designed to help students improve their maths skills.

We as a school, are interested in subscribing **year 4** on a trial bases (pilot) for next school year (2010-2011). After that year we will evaluate the participation and performance of this class. Should any parents be interested in subscribing their child during that year you may visit the following link to register: www.mathletics.com

I believe the costs will be 59 dollars per child per year.

If you have any queries about registering or would like further information please do not hesitate to get in touch.

Kind regards

Lily-Anne Coughlan
